

Week  $\Rightarrow$  4.

Today, ma'am told us a story of a hen where the hen took the right decision and choose the right opportunity to go with the big sage and live a happy life instead of living a life with regret.

likewise we all should grab opportunity time to time.

In this session ma'am want us to prepare for TAT so ma'am started by ~~giving~~ telling about her childhood stories.

~~where~~ from which we came to know about her more, what past memories have made her what she is right now. and came to know how to deliver stories.

Then we all came to know about two things Perception and Apperception.

What was my understanding of these two words was : Perception is the first thing we feel for a thing, its like

to tell about a noun by its first appearance.  
Joining that perception or what that  
noun remind ~~of~~ you of a past story,  
experience or thought is Apperception.

~~These~~ ~~the~~

These two things helps in identifying  
Psycho Dynamics of a person. Following this  
the class ended by a game where  
we have to sing a hindi song in english  
and our classmates would have to identify  
what song is it? But we were not  
able to finish the game due to time  
constraint as it was already 6:00 o'clock  
and bus students have to leave.
